

Tower Frequency: 127.2

Ground Frequency: 121.75

NOT FOR NAVIGATIONAL USE**RWY 29 @ TWY Y**

When exiting runway 29 at TWY Y, it can be difficult for the Tower to see aircraft exiting during periods of low visibility or during dawn, dusk or nighttime hours.

**Intersection: TWYs V, B, W**

The Ground Run-Up Enclosure (GRE) obstructs the Tower's view of this area significantly. Ground Control may issue taxi instructions that include the use of TWY B or V, so use caution in following the correct one. The Tower will not be able to verify whether you've taken the correct taxiway. The GRE is so large, even a DC-10 can be hidden from the Tower's view.
